## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Specification*

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract **not exceed 150 words in length** since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

*The abstract filed on Apr. 18, 2009 exceeds 150 words in length and is (therefor) too long.*

### *Allowable Subject Matter*

All of the Applicants' claims have been allowed because neither U. S. Pat. 5,783,333 or U. S. Pat. 5,160,712 teach or suggest the claimed method for forming the carbonate precursors; nor the specific carbonate precursor, nor the lithium transition metal oxide product set forth in all of the Applicants' independent claims.
